Solid Ring

Flexible Ring

Benefits of Tamper Proof Keyrings

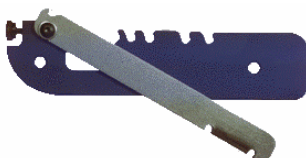

- Prevents key removal
- Not resealable if opened
- Replaces welded rings
- Serialised to identify rings & prevent substitutions
- 4mm stainless steel
- Available in 5 sizes

The Serial Number and Seal on the Tamper Proof Keyrings

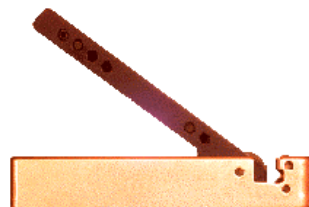

The serial number on each of the Tamper Proof Keyrings allows you to identify whether a ring has been substituted as each ring has an individual serial number, enabling you to cross reference the identity of your keys.

Tamper Proof Keyrings can be closed and sealed in seconds with simple tools that can be purchased from **PREGEM Secure**. The seal on the keyring is designed to allow keys to move freely around the ring and eliminates the need for costly and time-consuming welding.
